

CHARLES GREY

Quality. Experience. Service.

Charles Grey has experienced generous support within the marketplace through our trusted partners and friends. We are proud to announce an extension of the full service platform that Charles Grey has developed and continue with moving the brand forward by now offering Nori Mills Stair Systems, Vista Aluminum Railing, Jamsil Guard, Eva-Last Composite Decking.

Familiar and friendly faces that keep customers and employees first.

Charles Grey proudly serves the Carolinas and beyond. A name synonymous with quality and service, we bring you over twenty-five years of experience in the millwork industry. Knowledge, combined with experience, powers Charles Grey to understand what our LBM partners need and more importantly, when they need it. With strategic locations, we offer the ability of next-day delivery for most customers. We are committed to service our building partners as the leading wholesale distributors of mouldings, boards, and stair systems.

Jamsill Guard[®]
The ORIGINAL Sill Pan Flashing Since 1983

DOOR and WINDOW SILL PAN FLASHING

See Jammin' Jimmy and Buff in our New Technical videos at jamsill.com

"I use Jamsill Guard sill pan flashing on all my door and window installations."
- Jammin' Jimmy

Jamsill Guard[®]
The ORIGINAL Sill Pan Flashing Since 1983

Most leaks originate at...

The Critical Corner

- Reduce call-backs due to water damage
- Quick, simple and adjustable installation
- Sloped weep areas direct moisture out
- Glue joints located away from door and window leak areas
- Multiple-piece design and large glue tabs allow adjustability during install
- Accommodates virtually any size opening
- Available in many depths to fit any application
- Visit jamsill.com for more information

SELECT RADIATA

Radiata Pine boards are a premium choice for interior trim, furniture, and cabinetry projects. Our boards are surfaced four sides (S4S) and available in C-Select grade, offering superior appearance and performance.

Features + Benefits

- S4S (Surface Four Sides) for smooth, ready to use finish
- C-Select grade ensures minimal knots and consistent grain
- Ideal for painting or staining
- Lightweight and easy to handle
- Sustainability sourced Radiata Pine

Width x Thickness (inch)	Available Lengths (feet)
1x4	8', 10', 12', 14', 16'
1x6	8', 10', 12', 14', 16'
1x8	8', 10', 12', 14', 16'
1x10	8', 10', 12', 14', 16'
1x12	8', 10', 12', 14', 16'
5/4x6	12', 16'

Note: All boards are kiln-dried and precision-milled to ensure quality and consistency.

PRIMED FJ

Features + Benefits

- Finger joined construction provides structural integrity
- Primed surface saves time during finishing
- Smooth and uniform appearance makes it ideal for trim and moulding

Size	Thickness	Length
1x2	21/32"	23/32" 16'

Note: See full board offering on page 56.

MDF

Upgrade your building projects with our high-quality MDF (Medium Density Fiberboard) products--engineered for precision, consistency, and performance.

Why Choose MDF?

- Smooth Surface: Ideal for painting and laminating.
- Consistency Density: No knots or grainf or easy cutting and shaping.
- Eco-Friendly: Made from recycled wood fibers.
- Cost-Effective: Affordable alternative to solid wood.
- Versatile Applications: Perfect for cabinetry, molding, furniture, and interior trim.

Available Sizes & Specs

Size	Type	Length	Finish	Thickness

The Ellison Collection:

Where Modern Design Meets Timeless Elegance

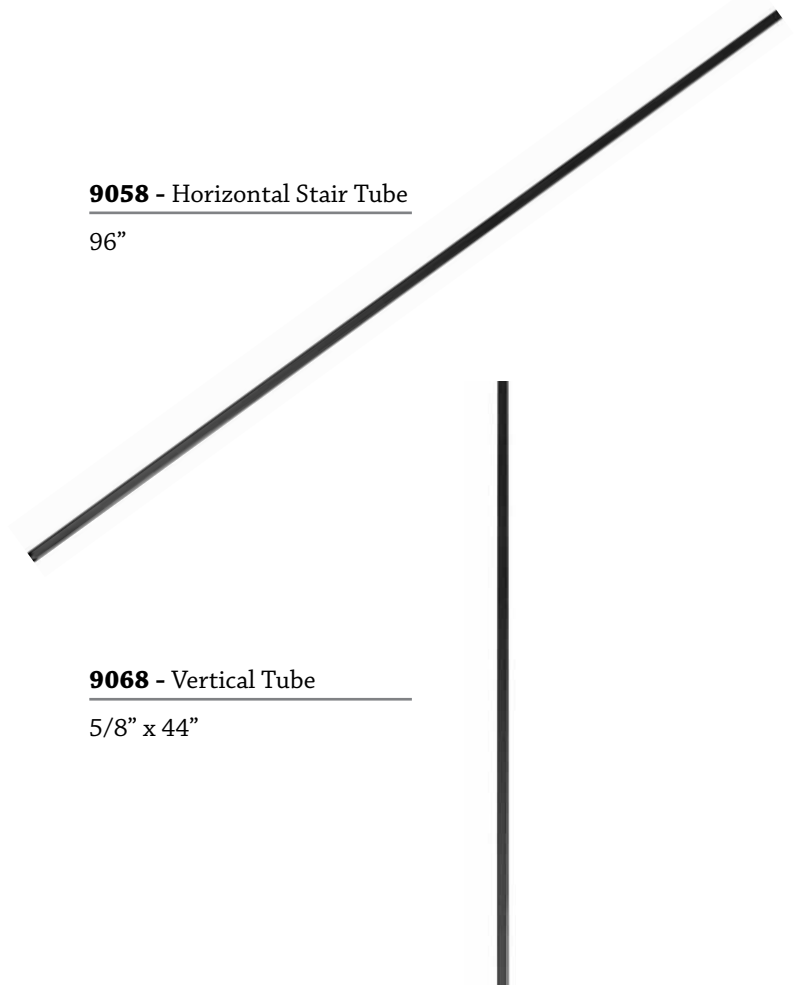

Elevate your space with the refined simplicity of the Ellison Collection. Featuring metal bars in a sophisticated flat black finish, this collection is designed to offer unobstructed views while infusing your project with a bold, contemporary aesthetic. Whether you're building anew or refreshing an existing space, the Ellison Collection delivers a lasting impression of style and modernity.

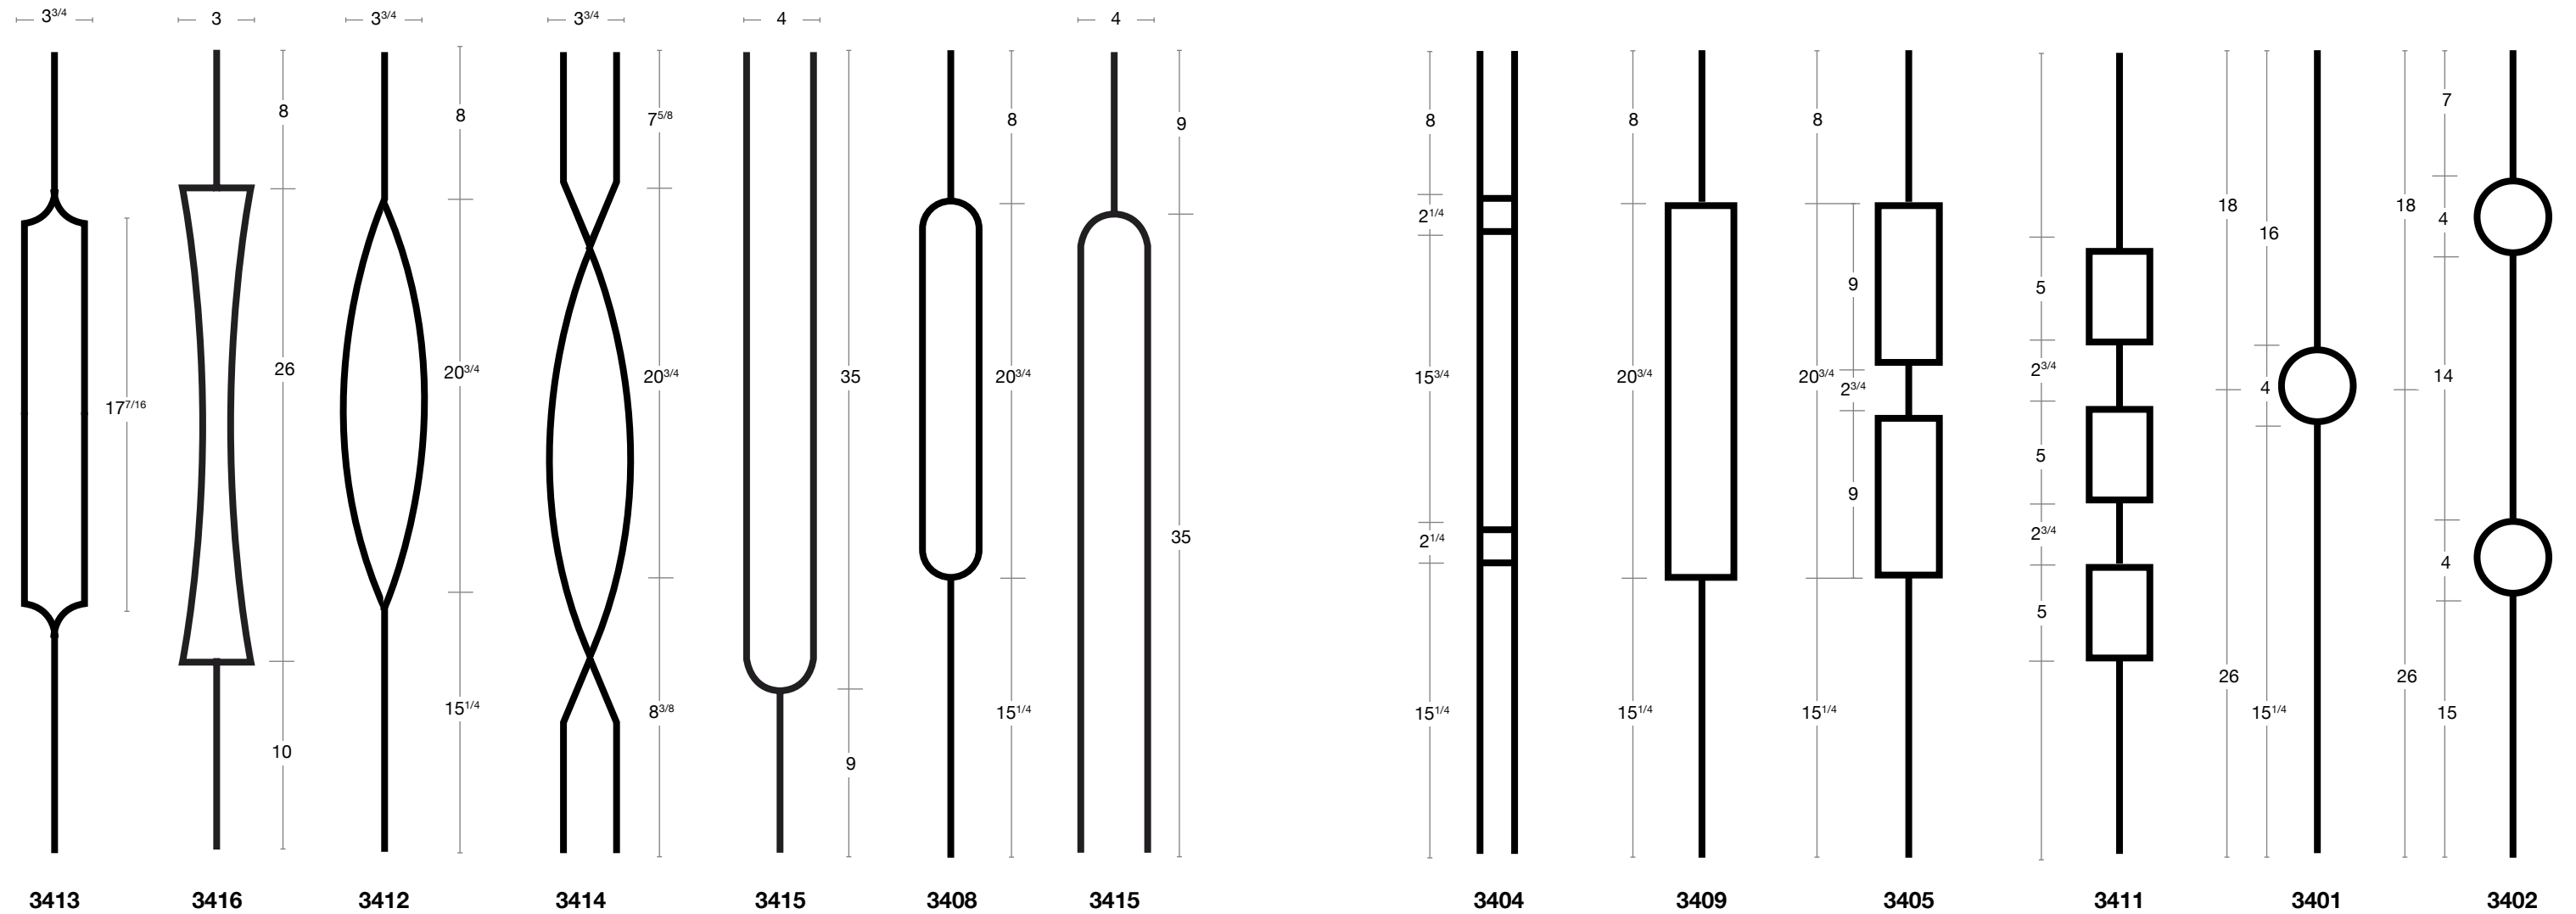

9058 - Horizontal Stair Tube

96"

9068 - Vertical Tube

5/8" x 44"

The Duncan Collection is a series of visually pleasing flat black balusters that make endless custom opportunities for your clients. Easy to handle and install, these 1/2" hollow balusters create the look of luxury without the price tag.

Combining materials like wood and metal creates a dynamic look and adds beauty to function.

Eva-Last composite decking is designed to make any outdoor area more beautiful, hassle-free, and sustainable. With three unique ranges of low-maintenance decking available, Eva-Last composite is the ideal environmentally-friendly alternative to timber decking. Choose from an extensive range of natural colors, finishes, and accessories within each product line – all offering long-lasting durability and resilience.

THE EVA-LAST RANGE

Eva-Last offers four unique decking technologies, each with their own distinct characteristics, benefits, look, and feel. Discover which composite range is right for you.

RENEWABLE RESOURCES & RENEWABLE ENERGY

We believe that how we manufacture is just as important as what we manufacture when it comes to going green. That's why we've traded in fossil fuels for renewable energy. Our products use solar power as part of our manufacturing process. We are fully committed to bringing you a product that's holistically eco-conscious.

Every Eva-Last range pairs recycled raw ingredients with bamboo for a stronger, more sustainable composite. Bamboo rejuvenates over 30 times faster than traditional hardwoods and it releases 35% more oxygen into our air. Eva-Last is internationally recognized for our commitment to the environment. We're proud of the work we do to promote environmental

LOW ENVIRONMENTAL IMPACT
Holistically sustainable manufacturing & use of raw materials

- Made from recycled materials
- No trees felled
- No treatment or toxic chemicals required for maintenance
- Solar power used in the manufacturing process
- Reduced impact on landfills

Pioneer

RARE WOOD REPLICATED IN REINFORCED BAMBOO-PVC COMPOSITE

Pioneer offers photorealistic print technology for a remarkable natural look and a glass fiber-reinforced core for increased strength.

Apex PLUS

REINFORCED, CAPPED BAMBOO-PVC COMPOSITE

Apex PLUS offers you a resilient and natural looking composite with a glass fiber-reinforced core, that allows for increased strength and span capability.

Infinity

CAPPED BAMBOO COMPOSITE DECKING

Infinity leads the market in durability with a resilient polymer capping, and bamboo-plastic composite core.

RARE WOOD REPLICATED IN REINFORCED BAMBOO-PVC COMPOSITE

Pioneer redefines what composite decking is by capturing the soul and beauty of hardwoods in every grain and hue. Engineered with next-generation technology, it delivers the timeless look of natural timber for decades to come.

Luxurious rare wood design in an affordable bamboo composite

Pioneer composite charts new territory with its ideal blend of beauty and strength. Its advanced engineering elevates both its functionality and aesthetics to give you a board that is as natural looking as it is robust for the creative freedom your outdoor designs demand. Pioneer decking boards can be worked just like wood and can also be used to create stairs and cladding.

Apex PLUS

8110-2314-0500
Approved for use in the Wildland Urban Interface areas

REINFORCED, CAPPED BAMBOO-PVC COMPOSITE

Apex PLUS offers you a resilient and natural looking composite. Its bamboo foamed-PVC and glass fiber-reinforced core allows for increased span capability over Apex. Low-maintenance Apex PLUS is more stable with less expansion and contraction than its predecessor, and requires only basic cleaning for optimal longevity. Its protective cap is made from a resilient acrylic polymer coating, for long-term fade, scratch, and stain resistance. Apex PLUS also provides decay resistance against insects, moisture, and the elements. Apex PLUS is an eco-friendly alternative to timber that prevents deforestation and premature deck replacement and uses solar power within the manufacturing process.

REINFORCED, CAPPED BAMBOO-PVC COMPOSITE

Composite comes in different shapes, styles, and qualities. Before purchasing a composite, familiarize yourself with your options in order to choose the best composite material for your job.

Better performing, better looking composite

Apex PLUS offers you a resilient and natural looking eco-friendly composite, with a bamboo foamed-PVC and glass fiber-reinforced core, that allows for increased strength and span capability.

Capping material:
Engineered acrylic polymer

Apex decking boards can be worked just like wood and can be used to create stairs, cladding, privacy screening, and more.

APEX PLUS COLOR GUIDE

The Apex and Apex PLUS dual color range adds an additional layer of color to each board to further enhance its natural look. The variance in shades within a single composite profile beautifully showcases the color tones found in timber making your composite all the more striking. Dual tone colors are ideal for mid-to-large-scale composite decks and projects or other areas that are all about that natural look.

Apex PLUS

CAPPED BAMBOO COMPOSITE DECKING

Infinity bamboo composite is the ultimate in durability and one of the toughest co-extruded composite ranges available. Its resilient protective cap made of advanced polymer resists scratches, fade, mold, and mildew, and makes Infinity exceptionally low maintenance, requiring only the most basic cleaning for ultimate longevity. Enjoy the stain and slip resistance of this environmentally friendly alternative to wood.

Capping material:
Engineered polymer

Core material:
Bamboo PE composite

INFINITY COLOR GUIDE

Infinity composite offers exceptionally natural-looking colors thanks to its advanced color technology that gives each board unique color variation to embody the essence of timber. This specialized color streaking technique also ensures that no two boards are identical and that all boards boast the beautiful appearance of wood. Choose from a range of hues and tones to complement your space and style.
